PAGES

Task Force Report *(5 July 1990)*

Does the Nutrition Society serve the needs of its overseas members? *A. A. Jackson* 1–7

Assessment of Zinc Status *(Workshop: 26–28 September 1989)*

The assessment of zinc status: a personal view. *Peter J. Aggett* 9–17
Assessment of zinc status. *R. P. H. Thompson* 19–28

Nutrition and the Schoolchild *(Workshop: 26–28 September 1989)*

Food, vitamins and IQ. *M. Nelson* 29–35
Nutrient intake in schoolchildren: some practical considerations. *G. McNeill, L. Davidson, D. C. Morrison, I. K. Crombie, J. Keighran & J. Todman* 37–43
Nutrition education in Scottish schools. *Notes taken by M. E. J. Lean from a presentation by Moira McFarlane* 45–48
Food choices and preferences of schoolchildren. *Jane Thomas* 49–57

Diet Selection *(Symposium Proceedings: 29/30 March 1990)*

Diet selection by animals: theory and experimental design. *G. C. Emmans* 59–64
Mechanisms of diet selection: the translation of needs into behaviour. *Peter J. Rogers & John E. Blundell* 65–70
Diet selection – an ecological perspective. *R. Moss* 71–75
Diet selection by grazing animals. *John A. Milne* 77–85
Diet selection of pigs and poultry. *S. P. Rose & I. Kyriazakis* 87–98
Sensory and experiential factors in the design of foods for domestic dogs and cats. *J. W. S. Bradshaw* 99–106
Development of food choice during infancy. *Peter Wright* 107–113

Obituary Notice

Obituary Notice, R. H. Smith (1924–1991). *A. B. McAllan* i–ii

Nutrient–Gene Interactions *(Symposium Proceedings: 4–6 July 1990)*

Nutritional and hormonal regulation of genes for lipogenic enzymes. *Alan A. Goodridge, Dominic A. Fantozzi, Stephen A. Klautky, Xiao-Jun Ma, Cesareo Roncero & Lisa M. Salatti* 115–122
Trace element–gene interactions with particular reference to zinc. *John K. Chesters* 123–129
Molecular biology and vitamin D function. *D. E. M. Lawson & E. Muir* 131–137
Genetics of obesity and human energy metabolism. *Claude Bouchard, Jean-Pierre Despres & Angelo Tremblay* 139–147

Fibre Digestion in Farm Livestock *(Symposium Proceedings: 4–6 July 1990)*

Effects of microbial synergism on fibre digestion in the rumen. *Burk A. Dehority* 149–159
Digestion of non-starch polysaccharides by non-ruminant omnivores. *J. C. Mathers* 161–172
Genetic modification of fibre digestion. *Harry J. Gilbert & Geoffrey P. Hazlewood* 173–186
Manipulation of fibre digestion in the rumen. *E. R. Ørskov* 187–196

Clinical Aspects of Protein and Energy Metabolism *(Symposium Proceedings: 4–6 July 1990)*

Whole-body protein and amino acid turnover in man: what can we measure with confidence? *D. J. Millward, G. M. Price, P. J. H. Pacy & D. Halliday* 197–216
Organ-specific measurements of protein turnover in man. *Peter J. Garlick, Stephen D. Heys, Margaret A. McNurlan & Jan Wernerman* 217–225
Measurement of energy expenditure: the doubly-labelled-water method in clinical practice. *W. A. Coward* 227–237
Indirect calorimetry in critical care. *James L. Mullen* 239–244

Micronutrients and the Immune Response *(Symposium Proceedings: 4–6 July 1990)*

Vitamin E and the immune response. *J. Kelleher* 245–249
Vitamin A and the immune function. *Clive E. West, Jan H. W. M. Rombout, Akke J. van der Zijpp & S. Reinder Sijtsma* 251–262
β-Carotene and the immune response. *Adrianne Bendich* 263–274
Selenium and the immune response. *R. J. Turner & Julie M. Finch* 275–285

Health Implications of Nutrient–Gene Interactions *(Symposium Proceedings: 4–6 July 1990)*

Possible dietary factors in the induction of diabetes and its inheritance in man, with studies in mice. *John M. Stowers & Stanley B. W. Ewen* 287–298
Atopy, allergy and the alimentary canal. *Elspeth Young* 299–303
Fructose intolerance: diet and inheritance. *Timothy M. Cox* 305–309

Recent Research on the Placenta *(Symposium Proceedings: 4–6 July 1990)*

Current perspectives on placental development and its integration with fetal growth. *J. M. Bassett* 311–319
Energy and substrate requirements of the placenta and fetus. *William W. Hay Jr.* 321–336
Placental transport studied by means of isolated plasma membrane vesicles. *C. A. R. Boyd* 337–343
Perfusion of isolated human placenta. *K. R. Page* 345–347
Human placental trophoblast culture: one-sided and two-sided models. *David L. Bloxham* 349–354
In vivo méasurements of placental transport and metabolism. *William W. Hay Jr.* 355–362
Placental corticotrophin-releasing hormone: activator of the pituitary–adrenal axis in human pregnancy. *E. A. Linton, C. D. A. Wolfe & P. J. Lowry* 363–370

Modifying the Energy Density of Human Diets *(Symposium Proceedings: 4–6 July 1990)*

Determinants of energy density with conventional foods and artificial feeds. *Geoffrey Livesey* 371–382
Dietary energy density on using sugar alcohols as replacements for sugar. *Aren J. H. Van Es* 383–390
Changes in dietary energy with novel proteins and fats. *Peter N. Gillatt & S. M. Lee* 391–397
Modification of energy density with inhibitors of carbohydrate and fat digestion. *Rodney H. Taylor* 399–408

Slimming *(Symposium Proceedings: 6/7 September 1990)*

Moderator's remarks. *J. V. G. A. Durnin* 409–412
Obesity and health: why slim? *Mary A. T. Flynn & Michael J. Gibney* 413–432
A diet for slimming? *Carol A. Bowyer* 433–440
Physiological responses to slimming. *Andrew M. Prentice, Gail R. Goldberg, Susan A. Jebb, Alison E. Black, Peter R. Murgatroyd & Erik O. Diaz* 441–458
Exercise for slimming. *J. F. Andrews* 459–471
The association of slimming with eating disorders. *Ann Leader* 473–477
The Media and slimming. *Margaret Ashwell* 479–492
The safety of dieting. *J. S. Garrow* 493–499

The Sir David Cuthbertson Medal Lecture 1990 *(22/23 November 1990)*

The effects of injury and joint disease on muscle mass and protein turnover. *J. N. Alastair Gibson* 501–512

Mediterranean Food and Health *(Symposium Proceedings: 21 February 1991)*

The Mediterranean diet: fish and olives, oil on troubled waters. *T. A. B. Sanders* 513–517
The Mediterranean Italian diet: keys to contemporary thinking. *Flaminio Fidanza* 519–526

Diabetes and hormonal control of glucose homeostasis

Hypothalamic regulatory peptides and the regulation of food intake and energy balance: signals or noise? *Gareth Williams, Pauline E. McKibbin & H. David McCarthy* 527–544
Gut hormones in glucose homeostasis. *V. Marks, Linda Morgan, J. Oben & R. Elliott* 545–552
Metabolic control of insulin gene expression and biosynthesis. *Kevin Docherty, Andrew R. Clark, Valerie Scott & Stuart W. Knight* 553–558
Direct and indirect actions of nutrients in the regulation of insulin secretion from the pancreatic λ cells. *Peter R. Flatt, Christopher R. Barnett, Omar Shibier & Sara K. Swanston-Flatt* 559–566
Regulation of hepatic glucose metabolism by insulin and counter-regulatory hormones. *Keith Snell* 567–575
Abnormalities of glucose homeostasis in diabetes. *Malcolm Nattrass* 577–581
Abnormalities of cholesterol metabolism in diabetes. *Gerald H. Tomkin & Daphne Owens* 583–589

Disturbances of micronutrients and antioxidant status in diabetes. *J. J. Strain* 591–604
Interrelationships between obesity and diabetes. *Lieselotte Herberg* 605–617
Hypoglycaemic and anti-hyperglycaemic drugs for the control of diabetes. *C. J. Bailey* 619–630
Diet components in the management of diabetes. *Robert W. Welch* 631–639
Traditional dietary adjuncts for the treatment of diabetes mellitus. *Sara K. Swanston-Flatt, Peter R. Flatt, Caroline Day & Clifford J. Bailey* 641–651

Nutrition in a changing Europe

What is nutritional surveillance? *W. P. T. James & Ann Ralph* 653–659
The decision making process in nutritional surveillance in Europe. *Anna Ferro-Luzzi & Catherine Leclercq* 661–672
Nutritional surveillance: experiences from developing countries. *S. J. Ismail* 673–679
Nutritional surveys: ongoing activities in Europe. *B. P. M. Bloemberg & D. Kromhout* 681–685
Nutritional implications of political and economic changes in Eastern Europe. *W. B. Szostak & W. Sekula* 687–693
A case study: Bulgaria. *M. Haralanova* 695–701
The nutritional implications of changing food systems in Eastern Europe. *Bruce Traill & Spencer Henson* 703–718
Diet and disease in East and West Germany. *Lenore Kohlmeier & Reinhard Dortschy* 719–727

ABSTRACTS OF COMMUNICATIONS

4–6 July 1990

The effect of the oestrous cycle in rats on fat and protein selection. *H. G. Anantharaman-Barr & J. Décombaz* 2A
Stable isotope studies of albumin synthesis during normal pregnancy. *O. S. Olufemi, T. Lind, P. G. Whittaker & D. Halliday* 3A
Asymmetric enhancement of cAMP in human placental tissues after treatment with bPTH(1–34). *J. M. A. Williams, K. R. Page, D. R. Abramovich, C. G. Dacke & T. M. Mayhew* 4A
Interactions between feed protein, carbohydrate and fat on the lactational performance of rats. *N. C. Friggens, D. E. F. Hay & J. D. Oldham* 5A
Critical nutrient proportions for lactational success in rats. *N. C. Friggens, D. E. F. Hay & J. D. Oldham* 6A
Effects of long-term feeding of high-fat diets containing triolein or medium-chain triacylglycerols to lactating rats on the disposal of a meal containing the ^{14}C-labelled lipid. *Paulo F. A. Souza & Dermot H. Williamson* 7A
How is the energy budget balanced in well-nourished lactating women? *G. R. Goldberg, H. L. Davies, A. M. Prentice, W. A. Coward, M. Sawyer, J. Ashford, P. R. Murgatroyd & A. E. Black* 8A
Effect of a milk-free diet on fetal cord blood milk antibody levels: a study of normal and atopic mothers. *J. A. Lovegrove, S. M. Hampton, Jane Morgan & V. Marks* 9A
Serum and cord blood levels of anti-ovalbumin and anti-gliadin IgG in atopic and non-atopic pregnant women. *R. Morris, S. Hampton, Jane Morgan & V. Marks* 10A

Seasonality in children's growth rates in Southern Ethiopia. *F. Branca, G. Pastore, T. Demissie & A. Ferro-Luzzi* 11A
Growth of stunted children given nutritional supplementation and psychosocial stimulation. *S. P. Walker, S. M. Grantham-McGregor, C. A. Powell, D. T. Simeon & J. H. Himes* 12A
The effects of nutritional supplementation on the development of stunted children. *S. M. Grantham-McGregor, C. A. Powell, S. P. Walker, P. Fletcher & J. H. Himes* 13A
Total energy expenditure during childhood and adolescence. *P. S. W. Davies, M. B. E. Livingstone, A. M. Prentice, W. A. Coward, S. E. Jagger, C. Stewart, J. J. Strain & R. G. Whitehead* 14A
Comparison of simultaneous measures of energy intake and expenditure in children and adolescents. *M. B. E. Livingstone, P. S. W. Davies, A. M. Prentice, W. A. Coward, A. E. Black, J. J. Strain & P. G. McKenna* 15A
Distribution of energy intake in relation to calculated basal metabolic rate and adiposity in a national cohort study. *Fiona B. Key, Alison A. Paul, T. J. Cole & M. E. J. Wadsworth* 16A
24 h Energy expenditure and basal metabolic rate in female twins. *G. McNeill, J. Love, J. S. Smith & D. C. Morrison* 17A
Does genetic variation influence energy expenditure in cystic fibrosis? *A. O'Rawe, J. A. Dodge, A. O. Redmond, I. McIntosh & D. J. H. Brock* 18A
Increased thermic effect of a standard meal in chronically energy-deficient human subjects. *L. S. Piers, M. J. Soares & P. S. Shetty* 19A
Family food availability and anthropometric status in Gilan, Iran. *F. Rabiee & C. Geissler* 20A
Diet quality, environment and nutritional status in Gilan, Iran. *F. Rabiee & C. Geissler* 21A
Knowledge, diet, and stock decisions of small independent retailers with regard to 'healthy' foods. *B. J. Tighe, A. Wise & P. Cooper* 22A
Individuality of portion weights of fat spreads. *Catherine H. Kellet & A. Wise* 23A
How much does the public know about fat intake and heart disease? *Janet Cade & Janice Tate* 24A
General practitioners' knowledge, attitudes and practices regarding overweight and obesity. *Janet Cade & Shaun O'Connell* 25A
The effect of energy supplementation on noradrenaline-induced thermogenesis, thermic effect of a meal and basal metabolic rate in chronically energy-deficient human subjects. *M. Vaz, R. N. Kulkarni, L. S. Piers, M. J. Soares, A. V. Kurpad & P. S. Shetty* 26A
Aerobic capacity and post-exercise recovery characteristics of chronically energy-deficient labourers. *R. N. Kulkarni, A. V. Kurpad & P. S. Shetty* 27A
Potentiation as a possible mechanism to explain differences in dose response *v.* single dose infusion of noradrenaline while estimating thermogenic responses in human subjects. *A. V. Kurpad, R. N. Kulkarni, M. Vaz & P. S. Shetty* 28A
The effect of a graded infusion of adrenaline on metabolic rate, forearm electro-myographic activity and oxygen consumption. *I. W. Gallen, I. A. Macdonald, K. C. F. Fone & D. G. Maggs* 29A
The effect on the doubly- and triply-labelled water methods of water hydrogen incorporation into body fat in growing pigs. *Paul Haggarty, Brian A. McGaw, Malcolm F. Fuller, Susannah L. Christie & William W. Wong* 30A

Evaluation of dual photon absorptiometry for the assessment of body composition. *N. J. Fuller, A. Laskey, K. F. Szaz, S. A. Jebb & M. Elia* 31A
The use of 24 h urine nitrogen to detect bias in the reported habitual food intake of individuals assessed from weighed dietary records. *S. Bingham, A. Welch, A. Cassidy, S. Runswick & C. Gill* 32A
Chronic undernutrition in very-low-birth-weight infants who develop bronchopulmonary dysplasia. *D. C. Wilson, B. G. McClure, H. L. Halliday, M. McCreid & J. A. Dodge* 33A
Fruit consumption and lung function. *B. D. Cox, D. E. Walters, Sharon E. Erzinclioglu & Margaret J. Whichelow* 34A
Food frequency *v.* weighed intake data in Scottish men. *C. Bolton-Smith & A. C. Milne* 35A
Nutrient intakes from current, ex- and never smokers: results from the Scottish Heart Health Study. *C. Bolton-Smith, M. Woodward, C. A. Brown, W. C. S. Smith & H. Tunstall-Pedoe* 36A
In vivo measurement of changes in body composition: validation against 12 d continuous whole-body calorimetry. *Susan A. Jebb, W. A. Coward, P. R. Murgatroyd, Gail R. Goldberg & A. M. Prentice* 37A
Does consumption of alcohol with a meal promote fat storage? *B. J. Sonko, G. R. Goldberg, P. R. Murgatroyd, W. A. Coward & A. M. Prentice* 38A
The effect of previous feeding patterns on the oxidation and tissue (^{14}C) lipid accumulation after a meal containing (1-^{14}C) triolein in the rat. *Alison E. Tedstone, Vera Ilic & Dermot H. Williamson* 39A
The effect of ageing on glutamine metabolism in skeletal muscle of the rat. *M. Parry-Billings, B. Leighton, G. D. Dimitriadis, J. Bond & E. A. Newsholme* 40A
Lysine metabolism in young turkeys fed on diets containing different levels of lysine. *C. Linda Saunderson & Paul E. Waibel* 41A
The effect of dietary amino acid imbalance on respiration in chick liver. *N. S. Jessop, G. Allan, G. Walker & J. P. F. D'Mello* 42A
The influence of glycine and cysteine supplementation on the metabolic response to *Escherichia coli* endotoxin in rats fed on diets of marginal protein adequacy. *R. F. Grimble, R. Hailwood, A. A. Jackson & C. Persaud* 43A
Glycine and cysteine supplementation influences weight gain and liver glutathione, protein and zinc of rats fed on diets of marginally inadequate protein content. *R. F. Grimble, A. A. Jackson & C. Persaud* 44A
The influence of the dietary protein intake on the response of whole body protein synthesis and degradation to feeding. *G. M. Price, D. J. Millward, P. J. H. Pacy & D. Halliday* 45A
Assessment of protein metabolism in man with ^{15}N-labelled soya bean. *M. A. McNurlan, A. El-Khoury, E. Milne & E. B. Fern* 46A
Bicarbonate recovery: feeding *v.* time. *D. Wenham, P. J. Pacy, D. Halliday, G. M. Price & D. J. Millward* 47A
Protein conservation in the obese Zucker rat during fasting. *N. G. Wijesinghe, D. J. Millward & J. P. W. Rivers* 48A
Effects of food restriction on sodium and potassium balances in pregnant rats. *M. P. Vaquero & M. P. Navarro* 49A
The effect of inhibiting the bio-availability of additional vitamin B_6 on nitrogen utilization in the pig. *J. N. Swart, H. P. Spangenberg & H. C. Barnard* 50A
Intrinsic labelling of peas, chicken meat, eggs, goat's milk and human milk with ^{67}Zn. *T. E. Fox, S. J. Fairweather-Tait, J. Eagles & S. G. Wharf* 51A

Apparent zinc absorption by rats from foods labelled intrinsically and extrinsically with ^{67}Zn. *S. J. Fairweather-Tait, T. E. Fox, S. G. Wharf, J. Eagles, H. M. Crews & R. Massey* 52A

Zinc nutritive status and immunocompetence in anorexia nervosa. *A. Marcos, P. Varela, M. P. Navarro, G. Morande* 53A

Influence of tea on the availability of copper. *M. P. Vaquero, M. Veldhuizen, C. J. A. van den Hamer & G. Schaafsma* 54A

The effect of non-starch polysaccharide on urea kinetics in normal adult males consuming a low-protein diet. *M. Langran, B. J. Moran, Jane Murphy, S. A. Wootton & A. A. Jackson* 55A

The effect of non-starch polysaccharides on the magnitude and composition of faecal energy in normal healthy adults. *Jane Murphy, S. A. Wootton, M. Langran & A. A. Jackson* 56A

Influence of soluble non-starch polysaccharides and food intake on mucosal cell turnover and some gastrointestinal peptides in the rat. *I. T. Johnson & Jennifer M. Gee* 57A

The effect of low, medium and high molecular weight grades of guar gum on postprandial blood glucose and plasma insulin in non-insulin-dependent diabetics. *S. J. Gatenby, P. R. Ellis, L. M. Morgan, F. M. Dawoud & P. A. Judd* 58A

The effect of guar wheatflakes on postprandial blood glucose, plasma insulin and C-peptide levels in healthy subjects. *R. M. Fairchild, P. R. Ellis, S. Luzio, A. Byrne & M. A. Mir* 59A

Effect of zinc supplementation on intestinal permeability and morbidity among Bangladeshi children with persistent diarrhoea syndrome. *S. K. Roy, R. Haider, A. Tomkins & R. H. Behrens* 60A

Energy metabolism of pigs of high genetic potential: effects of protein and energy intake. *D. S. Rao & K. J. McCracken* 61A

Effects of feeding level and sex on nitrogen retention and serum insulin-like growth factor-1 in growing pigs. *J. A. Taylor, D. N. Salter, W. H. Close, G. H. Laswai & A. Hudson* 62A

Immune function tests, iron metabolism and susceptibility to infection in primary undernutrition and refeeding. *John Murray & Anne Murray* 63A

Effects of vitamin C on sorbitol in eye lens of guinea-pigs made diabetic with streptozotocin. *C. J. Bates & P. H. Evans* 64A

Vitamin C in stimulated and unstimulated leucocytes in culture. *C. J. Schorah, D. J. Royle & S. W. Evans* 65A

Plasma ascorbate concentrations in human malaria. *J. Knowles, D. I. Thurnham, A. V. S. Hill, M. Greenwood & C. M. Tang* 66A

The effect of vitamin E deficiency on immune function in Wistar rats. *L. Purkins, J. Kelleher & R. V. Heatley* 67A

Tissue concentrations of vitamin E, selenium and thiobarbituric acid reactive substances in ruminant calves depleted of vitamin E, or selenium, or both. *D. M. Walsh, S. Kennedy & D. G. Kennedy* 68A

Inhibitory effect of isomeric *cis* and *trans* C-18 monoenoic fatty acids on Δ6-desaturase activity in human vascular endothelial cells. *K. W. J. Wahle, Lesley Milne & C. R. A. Earl* 69A

Inhibition of enzyme efflux from damaged skeletal muscle: a non-antioxidant role for α-tocopherol? *Joanne Pheonix, R. H. T. Edwards & M. J. Jackson* 70A

Measurement and significance of hepatic menaquinones in rats fed on low-fibre diets. *M. J. Shearer, N. Kazim & J. C. Mathers* 71A
The effect of high viscosity guar gum flour on the rate of glucose absorption and net insulin production in the portal blood of the pig. *F. G. Roberts, A. G. Low, S. Young, H. A. Smith & P. R. Ellis* 72A
Effects of sucrose-feeding on in vivo rates of hepatic fatty acid, cholesterol and glycogen synthesis in rats given dietary guar gum or volatile fatty acid salts. *Laurentina M. R. Pedroso, J. C. Mathers & Heather J. Finlayson* 73A
Effects of ageing on the caecal fermentation response to oat-feeding in rats. *J. C. Mathers, Julia Kennard & O. F. W. James* 74A
Effects of dietary fibre (grass) level and time of day on caecal concentrations of volatile fatty acids and uric acid in the fowl. *C. J. Savory & Anne I. Knox* 75A
Continuous in vitro incubation as a model to study microbial metabolism in the hind-gut of pigs. *G. Breves & J. Dreyer* 76A
Effect of carbohydrate source and protein level on selected plasma characteristics and acetate metabolism of ovine perirenal adipose tissue in vitro. *N. D. Scollan & N. S. Jessop* 77A
Effect of intraruminal propionate infusion on rumen fermentation and whole body glucose turnover rate in forage-fed steers. *C. J. Seal, C. S. Roper & D. S. Parker* 78A
Digestibility of wheat middlings by the weaned pig: comparison of balance and indicator methods. *Devina McClean, K. King & K. J. McCracken* 79A
Patterns of children's malnutrition in an area of Southern Somalia with multiethnic composition. *F. Branca, A. Alas Ali & T. D'Arca* 80A
Anthropometric indices and risk of mortality allowing for socio-economic differences among Ugandan children. *V. Vella, A. Tomkins, I. Cortinovis, T. Marshall, J. Ndiku & V. Ayatomizek* 81A
Malnutrition as a risk factor for mortality from infectious diseases among Ugandan children. *V. Vella, A. Tomkins, J. Ndiku & V. Ayatomizek* 82A
Impact of *Ascaris lumbricoides* and other intestinal helminths on intestinal permeability and growth in Bangladeshi children. *C. A. Northrop-Clewes, P. G. Lunn, E. Rousham & C. G. N. Mascie-Taylor* 83A
Sire effects on growth and carcass characteristics of Friesian steers during the finishing period. *K. J. McCracken, C. A. Moore, R. W. J. Steen, E. F. Unsworth, D. J. Kilpatrick & F. J. Gordon* 84A
The influence of adrenalectomy on the 'anabolic' effect of testosterone implants in rats. *C. J. H. Woodward, R. E. Oakey & E. M. Whitaker* 85A
Metabolism in vivo of essential fatty acids in man using linoleic acid labelled with carbon-13 stable isotope. *A. Smith, Moira Thomas & K. W. J. Wahle* 86A
The contractile characteristics of rat skeletal muscle following consumption of a low-protein diet. *L. B. Levy & S. A. Wootton* 87A
Characterization of the haemodynamic responses to the ingestion of a high-fat and a high-carbohydrate meal in young subjects. *M. B. Sidery, I. A. Macdonald & L. J. Fullwood* 88A
The effect of a low-fat diet on hormone and metabolite concentrations following a mixed meal in healthy subjects. *Linda M. Morgan, Jacki A. Tredger, Jacqueline Wilkinson, Christine M. Williams, A. Zampelas & Vincent Marks* 89A
Fasting and postprandial hormone and metabolite concentrations in normal and diabetic subjects taking dietary fish-oil supplements. *Christine M. Williams, F. Moore, J. Wright, A. Zampelas & L. Morgan* 90A

The effects of peripheral and central glucocorticoids on insulin secretion in the obese Zucker rat. *M. Stubbs & D. A. York* 91A
Genetic influence on fatness and fat distribution in women. *J. Love & G. McNeill* 92A
The effect of formaldehyde-treatment of barley on starch digestion in sheep. *Maria E. Ortega-Cerrilla & Heather J. Finlayson* 93A
The effect of different pairs of feeds offered as a choice on food selection by sheep. *X. Z. Hou, G. C. Emmans, D. Anderson, A. Illius & J. D. Oldham* 94A
Operant studies on feed selection in sheep. *X. Z. Hou, A. B. Lawrence, A. Illius, D. Anderson & J. D. Oldham* 95A
A comparison of a split diet system and choice feeding on food intake and growth of broilers. *F. Shariatmadari & J. M. Forbes* 96A
The drinking behaviour of lactating cows offered silage *ad lib*. *J. M. Forbes, C. L. Johnson & D. A. Jackson* 97A
The effect of drinking water on food-intake responses to manipulations of rumen osmolality in sheep. *J. P. Barrio, S. T. Bapat & J. M. Forbes* 98A
The effect of force-feeding on the relationship between body fat and food intake in broilers. *A. Y. Yalda & J. M. Forbes* 99A
The effect of adding water to the diet on body fatness and food intake in broiler chickens. *A. Y. Yalda & J. M. Forbes* 100A
Dietary intakes of smokers and non-smokers in the Northern Ireland population. *J. J. Strain, K. A. Thompson & M. E. Barker* 101A
Diet and alcohol intake: a study amongst male university students. *T. R. Kirk, C. Soulsby, C. A. Brown & C. Smith* 102A
Smoking and diet: a study amongst male university students. *T. R. Kirk, C. Soulsby, C. A. Brown & C. Smith* 103A
Dietary behaviours and blood biochemical nutritional indices in Northern Ireland. *M. E. Barker, S. I. McClean, J. J. Strain & K. A. Thompson* 104A
Urinary plant oestrogen excretion in post-menopausal women. *A. Cassidy, S. Bingham, K. Setchell & D. Watson* 105A
Increased urinary excretion of 5-oxoproline in vegetarians. *C. Persaud, P. Bishop & A. A. Jackson* 106A

6/7 September 1990

Validation of energy and protein intakes assessed by diet history and weighed records against energy expenditure and 24 h urinary nitrogen excretion. *Alison E. Black, Susan A. Jebb & Sheila A. Bingham* 108A
No evidence of lower energy expenditure in post-obese women. *G. R. Goldberg, A. E. Black, A. M. Prentice & W. A. Coward* 109A
Metabolic and behavioural responses to altered energy intake in man. 1. Experimental overfeeding. *E. Diaz, A. M. Prentice, G. R. Goldberg, P. R. Murgatroyd & W. A. Coward* 110A
Metabolic and behavioural responses to altered energy intake in man. 2. Experimental underfeeding. *E. Diaz, A. M. Prentice, G. R. Goldberg, P. R. Murgatroyd & W. A. Coward* 111A
Vitamin E supplementation and vitamin E status of premature infants and the occurrence of retinopathy of prematurity. *Paul M. Mathias, E. B. Coleman, K. O'Sullivan & M. Hogan* 112A

Effect of tea on iron and zinc absorption in suckling rats. *M. Reddy, A. Flynn & F. O'Loughlin* 113A
Absorption of manganese from tea in suckling rats. *A. L. Fraile & A. Flynn* 114A
Adolescent attitudes towards body physique. *Maura Fox* 115A
Weight change in subjects voluntarily enrolling in successive annual 'sponsored slims'. *Joyce Hughes, Gill Franks & Michael Stock* 116A
Nutrient intakes of medically-advised and self-selected slimmers: results from the Scottish Heart Health Study. *C. Bolton-Smith* 117A
Hunger and food cravings in successful weight losers. *Elizabeth Evans* 118A
Failure to demonstrate brown adipose tissue thermogenesis in adult man using infra-red thermography during both cold- and glucose-induced thermogenesis. *Elizabeth M. White & J. F. Andrews* 119A
The effect of dietary α-tocopherol supplementation on the storage stability of chicken muscle. *P. J. A. Sheehy, P. A. Morrissey & A. Flynn* 120A
The effect of a non-absorbable lipid, lactitol polyester on fat-soluble vitamin and cholesterol levels in the rat. *A. O. Connell, J. F. Connolly, A. Flynn & P. A. Morrissey* 121A
The effect of propargylglycine feeding on copper status in the rat. *J. C. W. Brown, J. J. Strain & P. Young* 122A
Dietary intakes and essential fatty acid levels in patients with cystic fibrosis. *J. M. Thomson, R. Moore, C. McMaster & J. A. Dodge* 123A
Dietary calcium and fibre intakes in adolescents and in the elderly in Dublin. *Louise Byrne, Deirdre Kelly & N. P. Kennedy* 124A
Tissue activities of glutathione peroxidase (*EC* 1.11.1.9) and related enzymes in cattle depleted of vitamin E or selenium, or both. *D. M. Walsh, S. Kennedy & D. G. Kennedy* 125A
The effect of garlic on blood lipids and fibrinolytic activity. *K. M. Sheil & K. M. Younger* 126A
The effect of D-fenfluramine on body-weight of lean and obese Aston strain mice. *M. M. Murphy, C. M. Murphy & J. F. Andrews* 127A
Malnutrition is an infrequent feature of inflammatory bowel disease in remission. *M. A. O'Connell, D. Kelleher, D. G. Weir, P. W. N. Keeling & P. Flood* 128A
Relation between levels of linoleic acid in plasma non-esterified fatty acids and plasma and adipose tissue triacylglycerols in healthy adults consuming normal diets or diets high or low in linoleic acid. *Bernice Corriedan & Michael J. Gibney* 129A
The effect of iron status on antioxidant enzyme activities in male and female rats. *Heather E. Bristow, J. J. Strain & R. W. Welch* 130A
Estimation of energy expenditure by heart-rate monitoring in healthy children and adolescents: a validation study. *M. B. E. Livingstone, A. M. Prentice, W. A. Coward, P. S. W. Davies, C. A. Mahoney, J. A. White & J. J. Strain* 131A
Energy expenditure by minute-by-minute heart-rate in cystic fibrosis patients. *A. O'Rawe, J. A. Dodge, A. O. B. Redmond, M. B. E. Livingstone & P. S. W. Davies* 132A
Effect of antioxidant vitamin supplementation on the peroxyl radical trapping ability of plasma. *C. W. Mulholland & J. J. Strain* 133A
Homocystein toxicity towards human cell lines. *G. Mazdai, B. M. Harnigan & J. J. Strain* 134A

Insulin-like growth factor 1 concentrations in serum, colostrum and milk of ewes with single, twin and triplet lambs. *A. R. G. Wylie & D. M. B. Chestnutt* 135A

22/23 November 1990

Increased metabolic rate associated with cancer cachexia in mice bearing an adenocarcinoma (MAC 16). *J. C. Day, I. D. Morris & N. J. Rothwell* 138A

Evidence for the stimulation of human tumour growth by the amino acid L-arginine. *K. G. M. Park, S. D. Heys, K. Blessing, M. A. McNurlan, O. Eremin & P. J. Garlick* 139A

The effect of inhibiting gluconeogenesis on the synthesis of glycogen and lipid in cachectic tumour-bearing rats. *D. Matthews, O. A. Obeid & P. W. Emery* 140A

Rates of synthesis of glycogen and lipid following a meal in cachectic tumour-bearing rats. *O. A. Obeid & P. W. Emery* 141A

Increased whole-body and skeletal muscle protein synthesis in weight-losing cancer patients. *T. Preston, D. C. McMillan, K. C. H. Fearon & O. J. Garden* 142A

Whole-body protein turnover and the acute phase response in relation to the survival of colon cancer patients. *K. C. H. Fearon, D. C. McMillan, T. Preston, D. T. Hansell, A. Shenkin & O. J. Garden* 143A

Effect of vitamin E deficiency on the response of brain protein synthesis to anaesthesia with volatile anaesthetic agents. *K. Ferguson, G. Duthie, A. G. S. Baillie, J. Arthur, S. D. Heys, C. R. Dundas & P. J. Garlick* 144A

Effects of dobutamine on energy expenditure and substrate mobilization. *Ceri J. Green, S. Frazer, S. Underhill, Paula Maycock, Judith Fairhurst & I. T. Campbell* 145A

Changes in plasma catecholamines following surgery: the effect of body heat conservation or epidural anaesthesia. *F. Carli, J. Pearson & I. A. Macdonald* 146A

Protein synthesis rate in human skeletal muscle is unaffected by anaesthesia but decreases after abdominal surgery irrespective of total parenteral nutrition. *Pia Essén, Margaret A. McNurlan, Jan Wernerman, Graham A. Calder & Peter J. Garlick* 147A

Post-operative protein kinetics. The effect of nursing patients for 24 h in a thermoneutral environment. *J. Webster, F. Carli, M. Pearson, M. Read, S. Venkatesan & D. Halliday* 148A

Mechanisms involved in the fever and hypermetabolism induced by turpentine injection in the rat. *A. L. Cooper, E. Kirkman, R. A. Little, S. J. Hopkins & N. J. Rothwell* 149A

Nutritional assessment using simple pulmonary function studies. *R. Das-Gupta, A. W. Goode, A. Wade, J. Powell-Tuck, J. Treasure, P. Woodruff & N. S. Williams* 150A

The use of C-reactive protein, transferrin and prealbumin in monitoring the nutritional status of patients receiving total parenteral nutrition. *F. D. L. Finlay, A. S. Hutchinson & J. C. Ferguson* 151A

Six month responses to growth hormone therapy for growth disorders are predicted by early changes in body composition and energy expenditure. *J. Gregory, S. A. Greene, R. T. Jung, C. M. Scrimgeour & M. J. Rennie* 152A

Assessment of changes in total body water in patients undergoing renal dialysis using bioelectrical impedance analysis. *Susan A. Jebb & M. Elia* 153A

Percutaneous endoscopic gastrostomy for nutritional support: technique, indications and initial results. *Brendan J. Moran & Roger A. Frost* 154A

A new cuffed polyurethane catheter for long-term central venous access: clinical evaluation confirms safety and efficacy. *Brendan J. Moran, Graham L. Sutton, Hugh Parry & Steven J. Karran* 155A

Superior vena cava thrombosis in patients on home parenteral nutrition; aetiology and mortality. *D. J. Leinhardt, T. O'Hanrahan, J. Shaffer, M. M. Mughal & M. H. Irving* 156A

Resting energy expenditure in children with liver disease. *S. R. Wilson, P. Amoroso, A. Baker, J. C. Ponte & C. Ball* 157A

Practical and nutritional aspects of an elemental diet in the management of Crohn's disease. *M. Pearson, K. Teahon, A. J. Levi & I. Bjarnason (Introduced by P. Brereton)* 158A

Colonic preservation reduces the need for long-term intravenous nutrition, water and electrolyte therapy in the short bowel syndrome. *J. M. D. Nightingale, D. J. Gertner, S. R. Wood & J. E. Lennard-Jones* 159A

Inter-observer variability in the measurement of body fat. *Susan A. Jebb, N. J. Fuller, Gail R. Goldberg, T. J. Cole & M. Elia* 160A

Isolation of sinusoidal membrane vesicles from human liver for studies of amino acid transport: a preliminary report. *A. Ahmed, P. M. Taylor, J. M. Barua, F. C. Campbell & M. J. Rennie* 161A

Are values of leucyl-tRNA labelling from muscle biopsies reliable? Some supporting evidence. *P. W. Watt, J. N. A. Gibson, Y. Lindsay, S. Downie & M. J. Rennie* 162A

Urinary nitrogen, urinary urea and urinary amino acids during intravenous feeding in multiple organ failure. *Ceri J. Green, C. M. Scrimegour, M. Bosomworth, Kath Shipley, P. McClelland & I. T. Campbell* 163A

Regulation of hepatic phosphofructokinase-1 activity in septic surgical patients. *J. Arnold, M. J. Hamer & M. H. Irving* 164A

Twenty-four hour energy and substrate balance in patients receiving total parenteral nutrition. *Edgar Pullicino, Gail R. Goldberg & Marinos Elia* 165A

Effect of local injury on protein synthesis in skeletal muscle in the rat. *A. Ghusain-Choueiri & P. W. Emery* 166A

Time course of the effect of volatile anaesthetic agents on tissue protein synthesis. *K. Ferguson, A. G. S. Baillie, A. C. Norton, C. R. Dundas & P. J. Garlick* 167A

The effects of dietary lipids on metabolic responses to tumour necrosis factor. *Hilda Mulrooney & R. F. Grimble* 168A

Modulatory effects of glycine and cysteine on the response of glutathione and acute-phase proteins to tumour necrosis factor α in rats. *R. F. Grimble, A. A. Jackson, C. Persaud & M. A. Wride* 169A

The influence of total parenteral nutrition on rat liver protein synthesis in an acute-phase reaction induced by interleukin-1β or turpentine. *P. E. Ballmer, M. A. McNurlan, I. Grant & P. J. Garlick* 170A

Unsaturated fatty acids inhibit interleukin-2 production by concanavalin A-stimulated lymphocytes. *P. C. Calder, J. A. Bond, S. J. Bevan & E. A. Newsholme* 171A

L-Arginine stimulates human lymphocyte natural cytotoxicity. *K. G. M. Park, P. H. Hayes, P. J. Garlick & O. Eremin* 172A

21 February 1991

Meal characteristics as indicators of nutrient intake. *Annie S. Anderson, Andrew Walker & M. E. J. Lean* 174A
Ethnic food preferences. *Herbert L. Meiselman & Rick Bell* 175A

19–21 June 1991

Attitudes to food allergy: a survey of general practitioners in Dublin. *S. Sugrue & N. P. Kennedy* 177A
Dietary control in the first year of life and its associated problems in children with phenylketonuria. *S. A. McGrath, P. Mathias, I. Saul, G. Darling & E. R. Naughten* 178A
The relationship of human milk growth factor activity with maternal body mass index and maternal age. *G. P. Sherry, V. J. McKelvey, W. S. Gilmore, S. Millar, P. Loane, M. Kell & J. M. Fletcher* 179A
Snack energy and nutrient intakes of Northern Ireland adolescents. *P. J. Robson, J. J. Strain, G. W. Cran, J. M. Savage, E. D. Primrose & C. A. G. Boreham* 180A
L110140 (Fluoxetine) is an antidepressant and appetite suppressant: does it have thermogenic properties? *C. M. Murphy, J. F. Andrews, J. Stinson & G. H. Tomkin* 181A
Effects of copper deficiency and induction of streptozotocin (STZ)-diabetes on trace element mineral status in the rat. *B. M. McDermott, J. J. Strain & P. R. Flatt* 182A
Control of manganese absorption in sucking and weanling rats. *A. L. Fraile & A. Flynn* 183A
Bioavailable zinc concentrations in soya milks and cow's milk. *M. Reddy & A. Flynn* 184A
Effect of phytate on iron and zinc absorption from a model food system in sucking rats. *K. Cashman, A. Flynn & M. Harrington* 185A
The effect of cereal source and processing on post-prandial glucose, insulin and GIP responses to starch in man. *R. Elliott, Linda Morgan, Jacki Tredger & J. Wright* 186A
Effects of orally-administered amino acids on circulating gastric inhibitory polypeptide (GIP) and insulin concentrations in genetically-obese hyperglycaemic (ob/ob) mice. *P. Kwasowski, C. J. Bailey & P. R. Flatt* 187A
The role of insulin and GIP in lipid metabolism in obese (ob/ob) mice. *J. Oben, Linda Morgan, J. Fletcher, P. R. Flatt, J. M. Knapper & V. Marks* 188A
Effects of intraduodenal administration of fat or glucose on gastric inhibitory polypeptide concentration in portal blood of goat kids. *J. P. McCarthy, P. A. Martin, A. Faulkner & D. J. Flint* 189A
Modification of lipoprotein lipase activity in response to gastric inhibitory polypeptide (GIP) in rats intubated with triolein. *J. Oben, Linda Morgan, J. Fletcher & V. Marks* 190A
Effects of neonatal under- and overnutrition on the function of the entero–insular axis in rats. *J. M. Knapper & P. R. Flatt* 191A
Influence of vegetable oils and α-tocopherol supplementation on tocopherol concentrations in chick tissues. *P. J. A. Sheehy, P. A. Morrissey & A. Flynn* 192A
Measurement of radical-trapping antioxidant parameter (TRAP) activity in plasma using chemiluminescence. *Ruth Coll & D. I. Thurnham* 193A

Iron status, antioxidant enzymes and tumour load in male and female rats treated with 1,2-dimethylhydrazine (DMH). *H. E. Bristow, J. J. Strain & R. W. Welch* 194A
Effect of high dose antioxidant vitamin supplements on serum markers of oxidant damage. *C. W. Mulholland & J. J. Strain* 195A
Immune responses in calves depleted of vitamin E, or selenium or both. *J. M. Pollock, D. M. Walsh, D. P. Mackie, D. G. Kennedy & S. Kennedy* 196A
The effects of increased vitamin E supplementation on profitable commercial broiler production. *D. G. Kennedy, E. A. Goodall, S. G. McIlroy, D. W. Bruce & D. A. Rice* 197A
Elevation of serum insulin levels by the artificial pancreas and by oral carbohydrate loading stimulates cholesterol synthesis and storage in humans. *J. C. Stinson, D. Owens, P. Collins, A. Johnson & G. H. Tomkin* 198A
Serum amino acids during insulin-dependent diabetic and normal pregnancies and their relationship to estimates of fetal weight. *O. S. Olufemi, P. G. Whittaker, P. Humes & T. Lind* 199A
Glycine and urea metabolism during normal and diabetic pregnancies. *O. S. Olufemi, P. G. Whittaker & T. Lind* 200A
Insulin sensitivity in pregnancy: studies with the euglycaemic clamp technique. *K. Stanley, C. Bruce & R. Fraser* 201A
Insulin resistance and insensitivity in pre-eclampsia. *A. M. Ricketts, H. M. Payne-Robinson, T. E. Forrester, F. Bennett & J. Hall* 202A
The effects of ethanol and dietary protein level on weight gain, serum insulin and glucose, and pancreas weight in rats. *J. Anna Nikolić, Vesna Koko, Ljiljana Petronijević, Jasmina Varagić & Vera Todorović* 203A
The effects of feeding protected polyunsaturated fatty acids and α-tocopherol to calves depleted of α-tocopherol and selenium. *D. M. Walsh, D. G. Kennedy, S. Kennedy & E. Goodall* 204A
Is mulberry heart disease in pigs the result of uncomplicated vitamin E deficiency? *M. R. Nolan, S. Kennedy, W. J. Blanchflower & D. G. Kennedy* 205A
In vitro binding of bile acids to dietary fibres. *G. Quinn, A. Flynn & P. A. Morrissey* 206A
The effect of baked bean consumption on nutrient intake and serum cholesterol levels in human subjects. *Jacki Tredger, Linda Morgan, Avril Anderson & J. Wright* 207A
The effect of rice and wheat bran supplements on plasma lipids in healthy adult male volunteers. *M. A. T. Flynn, D. D. Sugrue & M. J. Gibney* 208A
Indices of body-fat distribution in angiographically-defined coronary artery disease in man. *M. A. T. Flynn, M. B. Codd, M. J. Gibney, E. Keelan & D. D. Sugrue* 209A
Regulation of insulin binding to sheep adipocyte membranes. *Sara Wastie, P. J. Buttery & R. G. Vernon* 210A
Fatty acid-binding protein in brown adipose tissue of the newborn lamb. *Asim K. Dutta-Roy, Yiming Huang & P. Trayhurn* 211A
The role of succinate in ovine cobalt–vitamin B_{12} deficiency. *P. B. Young, D. G. Kennedy, W. J. McCaughey & W. J. Blanchflower* 212A
The effects of cobalt–vitamin B_{12} deficiency on methionine synthase activity and phospholipid methylation in the sheep. *D. G. Kennedy, P. B. Young, A. M. Molloy, J. M. Scott, D. G. Weir, S. Kennedy & W. J. Blanchflower* 213A

The use of rat intestinal epithelial cells to study the growth-promoting properties of porcine, bovine and human milk. *G. P. Sherry & J. M. Fletcher* 214A
Effects of variety and harvesting method on the energy value of mature peas. *R. M. Weightman, J. C. Mathers & S. J. Wilcockson* 215A
Conventional factorial calculation underestimates the metabolizable energy value of peas. *J. C. Mathers, S. D. B. Cooper & R. M. Weightman* 216A
Hepatic drug metabolism in chronically-diabetic streptozotocin-treated rats. *C. R. Barnett, P. R. Flatt & C. Ioannides* 217A
The influence of metabolic events on the regulation of energy balance in cystic fibrosis. *A. O'Rawe, J. A. Dodge, J. Thomson & A. O. B. Redmond* 218A
A randomized study of starter enteral feeding regimens in a mixed intensive care unit. *C. A. McCabe, G. G. Lavery & B. J. Rowlands* 219A
Application of a newly developed diet questionnaire for use in health education. *M. G. O'Donnell, M. Nelson & P. H. Wise* 220A
Health attitudes and dietary behaviour in Northern Ireland. *M. E. Barker, S. I. McClean & K. A. Thompson* 221A
Dietary inadequacies in a free-living aged group in Dublin. *B. McLaughlin, M. Bradley & J. Kevany, M. Canton & B. Connolly* 222A
The effects of including or excluding sucrose in a weight reduction programme. *Mary McCreery* 223A
Assessment of energy expenditure and patterns of physical activity in healthy children, aged 7–15 years. *M. B. E. Livingstone, P. S. W. Davies, A. M. Prentice, W. A. Coward, J. J. Strain, C. N. Stewart & C. A. Mahoney* 224A

1–3 July 1991

The nutritional knowledge, attitudes and practices of male HIV-positive homosexuals. *C. D. Summerbell & B. Gazzard* 226A
The effects of dietary energy source and tryptophan on hormones of the entero–insular axis and glucose in the early weaned pig after an intragastric infusion of glucose. *A. A. Ponter, B. Sève, N. O. Cortamira, D. N. Salter & L. M. Morgan* 227A
Effect of vitamin E and related compounds on mitochondrial Ca^{2+}-retention capacity. *J. Phoenix & R. Guidoux* 228A
Effect of different dietary fats on mammary tumour incidence and on the fatty acid composition of membrane phospholipids. *Christine M. Williams & K. Maunder* 229A
Quantitative ^{13}C nuclear magnetic resonance spectroscopy: validation and application to studies of lipid metabolism. *S. C. Cunnane, R. McDonagh, S. Narayan & T. Allman* 230A
Cholesterol in the British household diet. *Cecilia McGrath, Janet Lewis & D. H. Buss* 231A
Dose-response of baked beans for hypercholesterolaemic pigs fed a Western-type diet. *Neuza M. B. Costa, A. G. Low & Ann F. Walker* 232A
Does a low-fat diet impair growth in pre-school children? *J. A. Payne, T. R. Kirk & N. R. Belton* 233A
Is milk a suitable supplementary food for the nutritional support of West African children? *K. Erinoso, S. Hoare, S. Spencer, P. G. Lunn & L. T. Weaver* 234A
Iron intake during weaning and the protein–energy nutritional and iron status of Asian toddlers in Sheffield. *M. B. Duggan* 235A

Tissue protein turnover in normal rats after a single dose of rat growth hormone. *J. A. Martinez, A. S. Del Barrio & J. Larraldé* 236A
Effect of salbutamol on skeletal muscle functional capacity in man. *Lucie Martineau, Michael A. Horan, Roderick A. Little & Nancy J. Rothwell* 237A
Energy intake and expenditure in body builders. *R. M. Quevedo, M. Cox, W. A. Coward, D. Jones, P. Pacey, I. Smeaton, D. Thorpe & D. J. Millward* 238A
Resting metabolic rate and body composition of normal and athletic adults. *R. M. Quevedo, M. Cox, D. J. Millward, R. Hesp, D. Halliday & P. Pacey* 239A
